

FOR IMMEDIATE RELEASE:

Dice Teams with Endeca to Provide New Job Search Experience

Endeca Information Access Platform Gives Technology and Engineering Professionals the Tools to Quickly Find, Evaluate and Apply for Jobs

NEW YORK, NY and CAMBRIDGE, Mass., September 26, 2006 – Dice Inc., the leading provider of job boards and job fairs for technology, engineering and security-cleared professionals, and [Endeca](#), a next-generation information access company, today announced a host of new job search capabilities on [Dice.com](#). The new job search experience, built on the [Endeca Information Access Platform](#) (IAP), is designed to help technology and engineering professionals more easily find and evaluate desirable career opportunities. Dice.com users can now take advantage of a variety of new features and functionality to speed the job search process and help them compare and contrast employment options more efficiently.

The Endeca IAP, a new type of information access technology, combines intuitive capabilities like search, navigation, visualization and analysis to help users quickly find, analyze and understand information. The new Dice.com job search experience was developed from the [Endeca for Directories](#) solution and then customized for technology and engineering occupations.

Dice.com's new interface includes:

- User-friendly inputs to ease site navigation and simplify job searching
- Unparalleled search refinement criteria to help candidates filter results by technology skills, full-time/contract status and telecommuting availability
- Pinpointed location searching to enable candidates to find jobs by zip code, state, metro area or area code
- Customizable RSS feeds to help candidates create tailored job alerts by keyword, skill, location and more

"Technology and engineering professionals often use industry-specific criteria and keywords when searching for jobs, and typically how a candidate defines and prioritizes that criteria changes on a case-by-case basis," said Scot Melland, President and CEO of Dice Inc. "Endeca has helped us create a personalized user experience where we can account for the various ways people find relevant job postings and enable them to compare options in a way that best meets their unique needs."

"Dice is the definitive technology job board on the Web. Our goal in working with them was to uncover and take advantage of their rich data assets in order to make better use of the data that differentiates Dice from general job boards," said Jason Lewis, SVP of worldwide marketing for Endeca. "By arming candidates with the multiple tools and the context needed to more easily discover the best job opportunities, Dice can offer an experience that would have been impossible with traditional keyword search and database approaches."

About Dice

Dice Inc. is the leading provider of job boards and job fairs for technology, engineering and security-cleared professionals. With a 16-year track record of meeting the ever-changing needs of the technology sector, our specialty industry focus and exposure to the most skilled tech-centric audience online foster a talent marketplace where employers reach hard-to-find, experienced and qualified technology, engineering and security-cleared candidates.

Dice Inc. provides services to help recruiters, consultants and businesses hire and train specialized technology, engineering and security-cleared professionals through its four businesses: Dice, the leading online career site for technology and engineering professionals (www.dice.com); ClearanceJobs.com, the premier secure job board focused exclusively on candidates with active or current U.S. Government security clearances (www.clearancejobs.com); Targeted Job Fairs, a leading provider of career fairs for technology, engineering and security-cleared candidates nationwide (www.targetedjobfairs.com); and MeasureUp, a leading destination for IT certification practice tests, assessments and online courses (www.measureup.com).
